

VINOSEAL GLASS CLOSURES

Vinventions is proud to include in its portfolio a solution that many consider the crème-de-la-crème of wine closures – the luxurious Vinoseal glass closure.

Custom engineered, Vinoseal delivers fault-free, predictable wine preservation. It creates a premium distinction on a crowded wine shelf and gives the wine connoisseur a very special opening experience. Offered through an international distribution partnership with Vinventions' strategic partner Preciosa, Vinoseal is in a class of its own. Wineries can look forward to the ultimate in packaging design and marketing appeal which is ideal for finer quality wines or for premium wines seeking to elevate their value perception through package-design enhancements.

Vinoseal is available in most global wine markets exclusively through Vinventions* and comes in an extensive range of decoration options typically customized to optimize overall package aesthetics. To help facilitate and optimize total package design incorporating Vinoseal closures, Vinventions also offers a complete solution package in specific markets. The package includes a selection of compatible bottles and capsules as well as bottling line equipment and support.

* Germany, Italy, Spain, North-America, South-America and China

DESIGN OPTIONS

COLOURS

This customization option plays with the colour of the closures. You can cover the clear or the black Vinoseal with transparent or opaque colours. The sealing ring can also be tinted any colour.

METALLIC

The Metallic set of Vinoseal Design Options lets you combine the glass closure with metals. The closure can be coated with a high-gloss silver metal or coloured with a special ink with a metallic effect. Very popular is the use of metal ornaments which are placed on top of the Vinoseal closure.

SPARKLE

Add various jewellery stones on any Vinoseal. From little gems in a form of a sticker to large size stones of all colours and shapes. Or refine the Vinoseal glass closure with a Rhinestone Cut – have the top of the closure cut into a shape that resembles a precious stone.

WOODY

This collection is a symbiosis of two amazing materials – wood and glass – and we are proud to say that no other closure offers this combination of materials. The wooden top comes in several colours and can be enhanced with embossing or hot foil stamping.

HOW IT WORKS

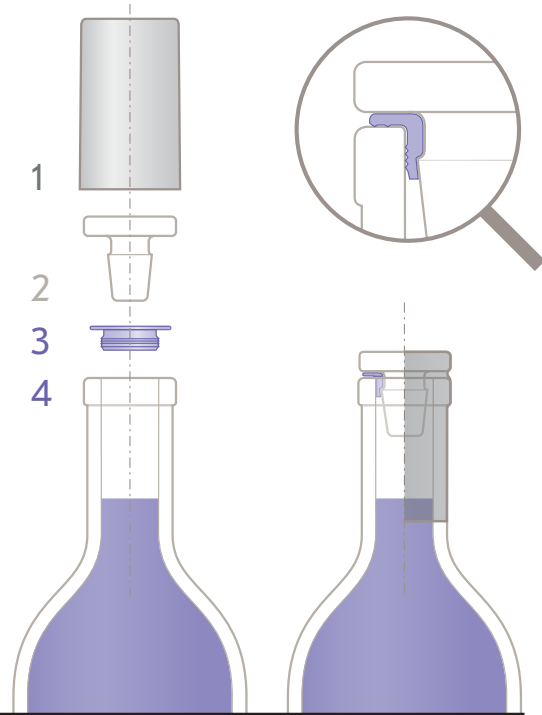

The Vinoseal closure is a part of a system consisting of a closure, a bottle, and a capsule.

The capsule ① ensures the safety of the system during storage and transport.

The glass closure ② is made from high quality glass and is resistant against mechanical damage.

The sealing ring ③ is made of Elvax by DuPont and contains no phthalates or allergens.

The closure can be inserted into the bottle ④ manually or by semi or fully automatic bottling machines.

AVAILABLE SIZES

The Vinoseal glass closure comes in sizes fitting bottlenecks of 17.5, 18.2, 18.5, 20.0, 21.5 and 23.0 mm. The Vinoseal glass closure has two different heights of the top to choose from. The Low Top comes in 17.5, 18.2, 18.5 and 20.0 sizes and is mainly used for wine packaging. The heavier version High Top is available in all sizes and is used primarily for spirits and water packaging. More info at <http://www.Vinoseal.com/product> and <http://www.Vinosealbottles.com>
